

# **Industries Sponsor Internship For College Students**

The Industrial Manager's Association (IMA) of Lincoln County is encouraging college students from Lincoln County to spend the summer of 2019 working as an intern with a local participating manufacturer.

Internships will focus on projects, problems and processes to develop related work experiences, build resumes and develop a local talent pool for employment upon graduation.

To qualify for the program, any current student, who has Lincoln County residency and finished at least the sophomore year of college or the first year of community college, is eligible to submit a cover letter and resume for consideration.

Lincoln Economic Development Association will act as a clearing house for the summer program candidates. Applicant's resumes will be distributed to participating businesses for consideration. If selected for the interview process, contact will be made directly by the interested company and the candidate will be sent through the hiring process.

Summer employment dates will be determined by the individual company and student. Internships are not guaranteed to all who submit a resume. Related fields of study are encouraged.

### **Past Internships Have Been Offered To Students Studying:**

Electrical Engineering, Mechanical Engineering, Finance, Accounting, Business, Economics, International Business, and Human Resources.

**Please submit resumes with cover letter to  
[john@lincolneda.org](mailto:john@lincolneda.org).**

**Deadline to apply for summer work  
opportunities is April 20, 2019.**
